

Overview – Solution Package

„MinorRev Handling vX“

- ❖ This small and simple Add-On package includes a working example of how minor revision handling can be added extending the major revision logic.
- ❖ It uses system property "minor_rev" to hold the minor rev values
- ❖ Minor revision count is „01,02..“ . On each new Major revision resets the Minor revision back to „01“.
- ❖ Only one method „MinorRev Handling“ is used. It needs to be attached to Server Event „onAfterVersion“ on verisonable item types.
- ❖ You can extent the method with this logic to add you own rules.

Installation

❖ Use the Solution Upgrade Tool to import the package „ **MinorRev Handling vX** “

→ You MUST use the „Merge“ option.

❖ Done

Testing –

- ❖ Create a new Document.
- ❖ Unlock and Save it .
- ❖ Edit it again (lock) .. Then save it → the minor revision counter goes up.
- ❖ Use Simple ECO to release the document.
- ❖ Use 2nd Simple ECO to raise a change to the document. → major rev „B“ and minor rev „01“
- ❖ When ECO is in „Draft Changes“ edit the document and save the changes → major rev „B“ minor rev „02“
